

# Students move Museum projects forward

May 1, 2017

Student

interns and faculty from New Mexico Highlands University's Program for Interactive Cultural Technology visit the Bradbury Science Museum to present and discuss several projects that are underway. Among them are a new video on the Manhattan Project, a historical scavenger hunt, a 360-degree virtual visit to three of the Lab's park buildings, and new interpretative panels on those currently inaccessible Lab facilities that are part of the park.
